

Splash Screen and Log In activity

The app opens to a splash screen which displays the logo of the app. The screen in the middle shows the login activity. If the user doesn't have an account, they can click on "Sign Up" at the bottom of this screen. The rightmost screen shows "Sign Up" activity. This will create an account for the user.

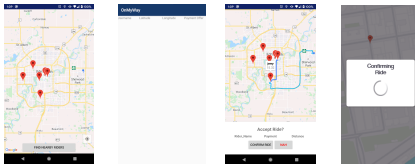

Home activity

This is the first screen to load after the splash screen. The user can type in a "to" location in the search bar and then click on "mode" to enter the "from" location. The user then clicks on "Request Ride" to generate a request.

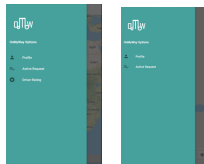

Price Activity

After a driver has accepted a request from a rider, the rider click on the "Edit Price" button to offer more. On clicking Edit price button, the view for editing the price pops up as shown in the screen on the right. The rider can input an amount in "\$" and this new price will show in Price Estimation field.

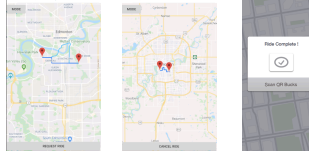

Driver's Side

On the driver's side, the driver will be shown their current location along with geolocations of current active requests. On clicking the "find nearby requests", drivers will be shown of list with requests and details. The riders can click on markers and a view will pop up with details of the ride. The driver's can click on confirm to offer a ride or deny if they do not want to accept this ride. The driver can click on the button in the bottom right to redirect the map to their current location. (Not implemented yet) Once the driver accepts a ride, the driver will be shown the rightmost screen while the app waits for the rider to accept the ride offer.

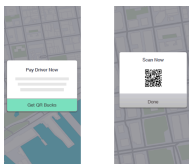

Navigation Menu

Riders and Drivers can swipe right on their screens to view this navigation menu. Users can click on profile to see their own profiles and on "Active Request" view details of the current ride. Additionally, riders can click on "Driver Rating" to check the driver's rating

Rider's side

Riders can input a "to" location in the search bar at the top and then press the "Mode" toggle to enter a "from" location. Riders can then click on "Request Ride" button to generate a request. Once a ride has been generated, the rider will have the option to cancel the ride. (Not Implemented yet) Once the ride has been completed the rider will see the rightmost screen

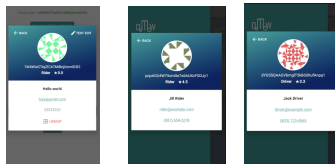

Payment Activity (Not implemented yet)

Once the ride is complete, the rider will be shown the option to pay the driver using QR Bucks. On clicking "Get QR Bucks" a QR code will be generated and sent to the Driver. The driver can scan this QR code to get paid.

Main Activity

The main activity has buttons for multiple other activities. The top of the screen shows the id of current user. If there is no one currently logged in user, "None".

Show Profile

Users can access profiles from the navigation menu in riders/ drivers map. Users can see their own profiles. Drivers will see a driver profile and riders will see a rider profile. In the main activity user can click on "Show Current User Profile"

Edit Profile

The users can edit details in their profile and delete their account.
